Description

BARNVALE

Our Calcium Silicate blocks are a tough and durable insulation, offering exceptional thermal efficiency on hot process applications.

Non-combustible, it is an inert material, containing non-asbestos. Can be supplied with an applied aluminium foil backing or with a sheet metal sleeve for vapour barrier purposes.

Product Application

An ideal insulation material for high temperature pipes and vessels and as a secondary backup insulation in furnace and smelter applications. Used throughout the Petrochemical, Power Generation, Furnace and Primary Aluminium sectors, it combines excellent thermal efficiency with high compressive strength.
